RAMPART
WE EQUIP YOUR MISSION

**CANADA'S LEADING SUPPLIER
OF OPERATIONAL EQUIPMENT**

WE EQUIP YOUR MISSION

Rampart is Canada's leading single source provider of **operational equipment**. We offer access to the largest selection of products and brands, world-class subject matter experts, and industry-leading customer service.

EQUIPMENT SOLUTIONS

Our experts are committed to serving the end-user with the world's best products.

If you're unsure of what you need, our experts work with you to find the right solution.

CUSTOMER SERVICE

Our top priority is to provide the highest level of customer service.

Our team is dedicated to providing on time, on budget, on target solutions.

SUBJECT MATTER EXPERTISE

We have subject matter experts who can help and assist every step of the way.

From initial request, to post-contract delivery, warranty, repair and anything else that might come up.

WHO WE SERVE

- ✓ **Military** *All branches*
- ✓ **Police** *Federal, provincial and municipal*
- ✓ **Corrections**
- ✓ **Wildlife & Conservation**
- ✓ **Armed Government Services**
- ✓ **Public Safety & Security**
- ✓ **Wildland Fire**

PERFECTION

Rampart is proud to be the exclusive provider of GLOCK firearms to Military and Law Enforcement in Canada.

**WE CAN MEET EVEN THE
MOST CHALLENGING MISSION
REQUIREMENTS.

WE EQUIP YOUR MISSION

2020 will certainly be a year of innovative products for us here at CZ-USA and Dan Wesson! The most obvious is the DWX — combining the quality and craftsmanship of the Dan Wesson pistols with the high capacity and great feel of a CZ. The efforts of our design team and product managers have created a very special pistol that not only shoots well, it is also incredibly good looking.

Innovation can also be seen in our shotgun line, where we have a patent pending system in our All-Terrain series that holds shells in the gun when it is open. It may seem like a small thing, but it helps our customers be more safe when in the field hunting, which is always a positive.

In our rimfire line we saw great innovation last year with the release of the 457 series. With many upgrades and improvements over our 455, it is proving to be very popular with customers. To bring something new to this line, we developed our own aluminum chassis to give shooters even more options when choosing a CZ rifle to compete with.

As we move forward with our manufacturing goals here in the United States, our team is always working to bring fresh ideas to the market. We have one of the most diverse sets of products in the firearms industry and will continue to strive for innovation. It is important to us to always provide the quality and reliability our customers have come to know us for while still being at a price point that a regular person can afford.

Thank you very much for your patronage!

Alice Poluchova
CZ-USA President

Keep an eye on our website (cz-usa.com) and webstore (shop.cz-usa.com) for updates to our products and accessories throughout the year.

Watch for CZ-USA firearms to be featured on *Petersen's Hunting Adventures*® on the Sportsman Channel, *CZ-USA's GunDog TV* on the Outdoor Channel as well as *Project Upland* and *Endless Migration*, which are published online.

We're always posting new products and event info on Facebook, Instagram, YouTube and our website. Visit us online and share your own photos, videos and experiences with other CZ enthusiasts by tagging us.

TACTICAL

BREN 2 Ms

CZ BREN 2 Ms PISTOL

223 Rem./5.56x45, 7.62x39 | Black

The next generation of the Bren, the Bren 2 Ms makes first landfall in the US in pistol form with multiple barrel lengths and two chamberings. Whereas the 805 Bren was designed to a specific set of requirements set out by the Czech military, the Bren 2 is a clean-sheet design. With a bevy of changes, the most noticeable is sure to be the strict weight-loss regimen that the Bren 2 has undergone. With a trimmed-down aluminum receiver and a lower made from carbon-fiber-reinforced polymer, the result is a robust but substantially lighter gun.

Gone is the reciprocating charging handle, replaced with one that stays stowed in the forward position until it is needed. Swappable from side to side, it does double duty as a forward assist. Also added is an AR-style bolt catch/release system that is mirrored on both sides of the firearm, as well as a catch/release nestled into the front of the trigger guard. The magazine release and safety are also ambidextrous and located in very familiar locations for anyone versed in the AR platform.

Chambered in 223 and 7.62x39, each is available in several barrel lengths. AR-15 style magazines are used for 223 variants, whereas in 7.62 the factory's magazines are used to ensure last round hold-open and consistent feeding. All variants are swappable to different barrel lengths and chamberings and also feature a modular forend that can be swapped to different lengths.

In pistol form, the Bren 2 Ms comes with a flush rear plate that has the provision for attaching an AR-style buffer tube for the installation of an arm brace, cheek rest or similar pistol stabilizing device. For those who wish to SBR, a Carbine buffer tube and stock can be installed or the entire rear plate can be removed and replaced with a factory folding/adjustable stock.

NEW

CZ SCORPION EVO 3 S2 MICRO PISTOL W/ FOLDING BRACE

9mm Luger | Black

With a 4" barrel, HB Industries short handguard and a folding SB Tactical brace, this new variant of the diminutive Scorpion Micro takes into account input from the CZ fan base. Replacing the previous Micro that was equipped with a collapsible brace, this version also gets a more minimal flash can muzzle device and Magpul MBUS back-up iron sights.

CZ SCORPION EVO 3 S1 PISTOL

9mm Luger | Black polymer

With dead-simple blowback operation, the Scorpion will chew through an ammo stockpile in no time flat. Based on our tried-and-true A1 submachine gun, the Scorpion Pistol and all of its variants revolve around the same principle — less is more. With fewer moving parts in general and over-built, robust components, the Scorpion derives reliability from its simplicity.

An 11-inch Picatinny rail rides on top, and a superb set of aluminum adjustable sights are fitted from the factory. With four rear aperture sizes, they can be set up for quick acquisition or precision with just a spin of the rear sight. The muzzle on the Scorpion Pistol is threaded with both 18x1 and 1/2x28, so fitting a suppressor or muzzle device is a no-brainer.

MODEL VARIANTS:

- CZ Scorpion EVO 3 S1 Pistol Battleship Grey — Battleship Grey furniture
- CZ Scorpion EVO 3 S1 Pistol FDE — Flat Dark Earth furniture
- CZ Scorpion EVO 3 S1 Pistol OD Green — OD Green furniture

CZ SCORPION

CZ SCORPION EVO 3 S1 PISTOL W/ FLASH CAN & FOLDING BRACE

9mm Luger | Black polymer

Equipped with a folding SB Tactical arm brace, this Scorpion Pistol wears the forend of its larger brother, the Carbine. With the same 7.7" pistol barrel, owners can unscrew the 5" KAK Flash Can and install most pistol suppressors under the handguard, keeping the overall length down. Dual threads of 18x1 and 1/2x28 make fitting a suppressor simple.

MODEL VARIANT:

CZ Scorpion EVO 3 S1 Pistol w/ Flash Can — Rear sling attachment plate instead of folding brace

CZ SCORPION EVO 3 S1 CARBINE W/ MUZZLE BRAKE

9mm Luger | Black polymer

The Scorpion Carbine is a whole new animal. Building on the lauded submachine gun platform that first hit the US civilian market in pistol form in 2015, the Carbine has a 16.5" barrel fitted with either a compensating muzzle brake or a faux suppressor. Fit with the factory's folding adjustable stock, the Carbine features a number of US-made parts to make it fully 922(r) compliant.

One of the nicest features of the firearm is the carbine-length forend, which is covered in M-LOK attachment points to keep the profile slim while still being big enough to swallow most pistol-caliber suppressors should the owner decide down the road to convert it to an SBR for use with a suppressor.

A set of Magpul MBUS sights round out the package, and a top Picatinny rail allows the mounting of optics.

MODEL VARIANT:

CZ Scorpion EVO 3 S1 Carbine w/ Faux Suppressor — Faux suppressor instead of brake

CZ SCORPION EVO 3 S1 CARBINE FDE W/ FAUX SUPPRESSOR

9mm Luger | FDE polymer

With a Flat Dark Earth exterior, this version of the Scorpion Carbine is a refreshing change in the endless sea of black carbines. There are two versions to choose from — one equipped with a faux suppressor and the other with a two-port compensating muzzle brake. The top Picatinny rail makes mounting optics easy, and the factory iron sights are Magpul MBUS flip-ups.

MODEL VARIANT:

CZ Scorpion EVO 3 S1 Carbine FDE w/ Muzzle Brake — Compensating muzzle brake

CZ SCORPION CARBINE BULLPUP KIT

Relying on the bullpup expertise of the aftermarket design gurus over at Manticore Arms, the Scorpion Bullpup Kit has been a project long in the making. Able to convert any Scorpion over to a bullpup configuration, it reuses trigger components of the gun being converted and condenses the Scorpion down to an even smaller package.

The ideal candidate for conversion is the Scorpion Carbine, and the bullpup chassis ties into our standard Carbine handguard as well as Manticore and HB Industries long handguards. With the addition of one of those handguards, Scorpion pistols can be converted as well, though doing so with a barrel length less than 16" will require proper paperwork/tax stamp and conversion of the pistol to an SBR.

For those who will want to modify their Scorpion Bullpup, it retains the ability to take aftermarket grips, trigger shoes, charging handles and magazine releases.

In addition to reducing the overall assembled length of the Scorpion Carbine, the Bullpup conversion also shifts the weight of the rifle to the rear.

Bullpup Kits can be purchased through our webstore at shop.cz-usa.com.

CZ-USA *SUPPRESSORS*

CZ-USA *RIMFIRE*

Any rimfire below .224", 17 Hornet, 22 Hornet | Black Cerakote

Simple, lightweight and highly effective! With a patented screw-in baffle system, our Rimfire suppressor maximizes its use of internal capacity. Unlike monocores or baffle stacks, there's no extra material contained within, eating up valuable capacity that could be aiding suppression. Not only does this help the Rimfire return impressively low dB readings, it also translates into light weight. Tipping the scales at a ridiculously low 2.5 ounces, we feel confident in saying that when it comes to suppression per ounce, the CZ Rimfire is at the top of the rimfire suppressor food chain.

Built to blend into the heavy cylindrical barrels found on most of our rimfire Varmint rifles, the Rimfire has an external diameter of 0.866" and a length of 6.9".

Another feature of our rimfire suppressor system is the ability to tune the baffle system itself. A guide is provided on the assembly/disassembly tool to space the four internal baffles at regular distances. If a user wishes, they can also vary those baffle depths in an effort to find the right mix for the particular load they're shooting. For example, if they want a large blast chamber with shorter spacing on subsequent baffles, the ability is at their fingertips.

Able to be easily taken apart for cleaning, the Rimfire can be used on any rimfire round under .224 in diameter, including 17 HMR, 22 WMR and even 17 WSM. Additionally, it is safe to use with 17 Hornet, 22 Hornet and 5.7x28. Due to the dirty nature of rimfire ammunition, cleaning every 300 rounds is recommended.

CZ-USA *S2 TI REFLEX*

9mm Luger | Black Cerakote

A fully-welded titanium can, the S2 Ti Reflex is designed to fit under an HB Industries or Manticore Arms handguard, allowing it to have a 2" reflex blast chamber and giving it the volume of much larger cans while only protruding from the muzzle 5.83 inches. This full titanium can weighs in at just 9.6 ounces and spits out 147-grain defensive loads at well under 130 dB.

For Scorpion owners who want the benefits of the S2 suppressor but at a more favorable price point, the S2 SS is the same fully-welded reflex design executed in 17-4 stainless steel. The stainless construction comes with a little more weight, though the less costly material cuts \$330 from the MSRP.

This is a direct thread for Scorpion Micros and Carbines, while most Pistols will require the addition of an aftermarket free-floating handguard.

MODEL VARIANT:

CZ S2 SS Reflex — Stainless steel construction

CZ-USA *RIMFIRE INTEGRAL 20.9"*

22 LR | Blue

If it weren't for the endcap, this suppressor would be completely unnoticeable — that is until the trigger is pulled. Then it still might go unnoticed, since with sub-sonic ammo the loudest report will be that of the striker falling.

Built into one of our standard 455 Varmint barrels, the Integral fits on any CZ 455 or 457 and utilizes the same patented screw-in baffle system as our stand-alone Rimfire suppressor above. Using the included tool, the owner can thread the baffles in to pre-designated locations within the forward threaded suppressor portion of the barrel. If they wish, they can tune baffle lengths to their liking, finding just the right combination for their load of choice.

Baffles and endcap are cut from 7075 aluminum, meaning between the hollowing out of the barrel and the lightweight suppressor components, the .866" diameter Varmint barrel experiences some weight loss while still measuring in at 20.9".

Rimfire ammunition is notoriously dirty, resulting in the buildup of carbon and lead in rimfire suppressors. To enable easy cleaning, each baffle has six cutters milled into it, letting it function much like a tap to cut its way through the accumulated crud. Just like with a tap, a few spritzes of oil will aid in cutting. The recommended cleaning interval for our rimfire suppressors is every 300 rounds.

MODEL VARIANTS:

CZ-USA Rimfire Integral 20.9" 17 HMR — Chambered in 17 HMR
 CZ-USA Rimfire Integral 16.9" 22 LR — Chambered in 22 LR
 CZ-USA Rimfire Integral 16.9" 17 HMR — Chambered in 17 HMR

CZ-USA *5.56 TI REFLEX*

223/5.56x45 | Black Cerakote

Combining light weight, superb suppression and short installed length, our centerfire reflex cans sport a very distinctive shape. To shave the ounces, each titanium baffle is turned down on a lathe until it possesses just the right amount of material to withstand the pressures of full-auto use. The swirled shape of the internal baffle structure is reflected in its exterior, and each baffle is welded to the next until the stack exhibits a very unique silhouette. Not only does this eliminate extra material that would simply add weight, it also increases surface area for heat dissipation.

The endcap and mount are replaceable, and each can is shipped with a 3" reflex mount that allows the user to boost the internal can capacity greatly without increasing the overall length when assembled, with a standard flush mount also included for use on firearms that won't allow for the reflex. Threaded 1/2x28 in 5.56, it is rated for full-auto use.

MODEL VARIANTS:

CZ 7.62 Ti Reflex — Rated for up to 300 Win. Mag., 5/8x24 thread
 CZ 338 Ti Reflex — Rated for up to 338 Lapua, 3/4x24 thread

MILITARY/LAW ENFORCEMENT ONLY

CZ BREN 2

223 Rem./5.56x45,7.62x39 | Folding/adjustable, black

The ever-evolving needs of military forces led to the further development of the Bren platform. Whereas the 805 was built to a specific set of predetermined requirements, the Bren 2 took years of input and data from use in the worldwide war on terror and put it all together in a smaller, lighter package.

A shorter gas system allows for barrel lengths down to 8", while giving settings for normal use or adverse conditions. The aluminum receiver is shorter and thinner, shaving weight from the rifle. Modular and built to swap between chamberings and barrels, the Bren 2 is available in multiple barrel lengths in 223 Rem./5.56x45 and 7.62x39.

Gone is the reciprocating charging handle and in its place is one that remains forward while the action cycles, but can be used to charge the rifle via a ratcheting mechanism that allows it to be used as a forward assist if needed. All controls are ambidextrous, including a bolt release located inside the trigger guard. For those familiar with the M16/AR15 platform, a paddle-style bolt catch/release is located on the left side of the weapon.

The Bren 2 is select-fire, currently only available for military/LE special-order.

CZ BREN 2 BR

308 Win. | Folding/adjustable, black

Chambered in 308 Win., the BR in this Bren's name stands for Battle Rifle. Piston-driven and loaded with all the same ambidextrous features seen on its smaller Bren 2 counterpart, this larger rifle adds a modular forend, much like the semi-auto Bren 2 Ms found earlier in this section. The Bren 2 BR is select-fire, meaning it is only available on military/LE special-order basis.

CZ SCORPION EVO 3 A1

9MM LUGER | Folding/adjustable, black

The CZ Scorpion EVO 3 A1 is a compact submachine gun in 9mm Luger. With a blowback-operated action, the Scorpion can empty its magazine in a hair over 1.5 seconds. Equipped with a folding, adjustable LOP stock, accuracy can be had out to 250 yards. The stock can be removed completely to create a surprisingly controllable machine pistol.

To make the Scorpion user-customizable, the reach to trigger is adjustable for different hand sizes, the charging handle is reversible, and the mag release is ambidextrous.

The EVO's frame and trigger guard assembly are made of a lightweight polymer with monolithic top rail and accessory rails on sides and bottom. Field strip is made simple with a captured pin that allows the removal of the trigger assembly, enabling easy removal of the bolt and all moving parts.

Select-fire versions of the Scorpion are only available on military/LE special-order basis.

FIRST RESPONDER PURCHASE PROGRAM

CZ-USA recognizes the many sacrifices our first responders and military members make on a daily basis. As a small way of saying thanks, we offer a special buying program for these special people (as well as retirees from these professions), and participants enjoy a significant savings off of MSRP. To request program details, email LESales@cz-usa.com.
