## KEY FEATURES

- Built of custom spec'd 500D CORDURA® with Teflon® and PU coatings for maximum durability, UV, and weather protection
- IR Compliant YKK® zippers
- This Internal Frame is an HDPE (high-density polyethylene) sheet that provides rigidity and yet is flexible. The Futura Yoke easily macro adjusts to the torso length allowing the proper amount of stand-off between the back and frame.
- BVS – Bolstered Ventilation and Stability system– allows for a stable, secure fit over body armor
- Featuring our classic 3-ZIP design for easy, rapid access to the interior
- Three rows of MOLLE on front panels
- Internal sleeves and ports integrate up to three hydration reservoirs
- Zipper port for radio and antennae access
- Radio inputs, outputs and antennas route easily through the three urethane coated zippered ports
- Velcro on lid for identification and patches
- Waist belt stows away when not in use

## PRODUCT DESCRIPTION

We've taken the classic design of the 3 DAY ASSAULT and streamlined the exterior by removing and updating features, making it the best pack for versatility and mobility. It has three rows of external MOLLE webbing, giving you options to expand, and side compression straps minimize bulk. The 3 ZIP provided easy access to sustainment gear, ammo, IFAKs and tactical radios.
