

Weapon Multi-Locker

Individually store weapons in separate lockers with a mailbox style master gate for quick deployment.

This storage system features individually locked compartments tailored for either sidearms or long guns. The locker's mailbox-style gate, coupled with DASCO's robust all-steel construction, guarantees that firearms are readily available when necessary and securely stored when not in use.

Features

- Available in eight different modules for sidearm and/or long gun weapon storage compartments.
- Long gun compartments feature a single-column Universal Back Panel to customize stock and barrel saddle positioning.
- Every locker includes a mailbox-style gate that can be opened with the master key, allowing all compartments to be accessed simultaneously.
- Choose to have lockers secured with ABLOY, WESKO, REAL, COMBI-Lock, or COMP-X locks.

Additional master lock mechanism opens every compartment at once for emergency access or maintenance.

Weapon Multi-Locker Modules

The Weapon Multi-Locker is available in six configurations, each offering different compartment sizes and setups to accommodate a variety of weapon types and storage requirements. Contact a DASCO sales representative for more info on how to make the most of your weapon storage space.
