

**MUSTANG SURVIVAL**  
RECREATIONAL WORKBOOK

For nearly sixty years, our passion for innovation and saving lives has driven us. We created the world's first floater coat in 1967 and continue to craft marine gear that pushes the boundaries of science, engineering and what is possible for professional and recreation users.

At our Waterlife Studio in Vancouver, British Columbia, we test human physiology and material properties in our science lab, trial product concepts in our prototyping shop, evaluate new ideas in our testing pool, and construct our marine gear in our manufacturing centre. Within these walls, our progressive and talented engineers and designers create customized products for the wide-ranging variety of customers we support.

Poised between the banks of the mighty Fraser River and the Salish Sea, our headquarters allows us to test what we build in real time, in real-world conditions. Our production takes place in our North American factories next to the Waterlife Studio in Vancouver and in Jacksonville, Florida, as well as overseas. We ensure each product meets the highest standard of quality and safety.

Our continued dedication to challenging the status quo and changing the standards of how marine gear is designed and built continues. We have created a brand-new inflatable bladder technology, ADAPT—ADvanced Airway Protection & Turning—that blends exceptional comfort with superior safety. The ADAPT Technology is featured in our new PFD platform utilized by the lightweight and low-profile redesigned Elite family and the winner of a special mention at the DAME awards, the Atlas. The new Atlas pairs perfectly with our reimagined and updated Meris collection for coastal and offshore sailing.

We protect life on the water, and everything we do upholds this mission.

## 2025 RECREATION COLLECTION

Mustang Survival's innovative 2025 spring recreational collection is here to enhance your marine adventures. Redesigns of key inflatable styles set the new standard in safety and comfort, and refined apparel designs take waterproof protection to new heights, ensuring you stay dry, comfortable, and prepared for the unpredictable conditions of the season. We remain as committed as ever to enriching your on-the-water experiences.

# DESIGNED FOR COMFORT. BUILT FOR SURVIVAL.

## NEW ATLAS & ELITE LIFE JACKETS

### ADAPT TECHNOLOGY

Stands for ADvanced Airway Protection & Turning. Utilized in our new groundbreaking bladder shapes.

ATLAS 190N BLADDER

ELITE 120N BLADDER

### ERGONOMIC DESIGN

Both the Atlas and the Elite use an ergonomic design. The ergonomic design improves all-day comfort, especially in the neck and shoulders, while providing high performance support in the water. The advanced safety features, user-friendly design, and hassle-free maintenance, make it an essential companion for any trip.

ATLAS 190 with UML Pro Sensor Elite shown

- Comfort: Ergonomic shape sits off the neck and a mesh panel increases breathability
- Durability: Cordura panels on lower lobes for abrasion resistance
- Safety: Integrated deck safety harness (Atlas Only)
- Performance: Lightweight anodized aluminum hardware (Atlas Only)

SAILING	BOATING	FISHING	PADDLING

## ELITE 190 LIFE JACKET

Our new Elite 190 Life Jacket is a reliable companion for sailing, fishing, and boating in coastal and offshore waters. This life jacket features the same groundbreaking bladder design found in our Atlas line, using new ADAPT Technology.

Elite 190: for coastal and offshore boating and sailing.

OPEN OCEAN	OFFSHORE	COASTAL	INSHORE
SAILING	BOATING	FISHING	PADDLING

## ELITE 120 LIFE JACKET

Introducing our redesigned Elite 28—the Elite 120. Still providing 28 lb (120N) of buoyancy, it is the perfect choice for anglers, sailors, and boaters seeking all-day comfort during inshore and coastal adventures. Utilizing our exclusive ADAPT Technology, the bladder ensures top of the line performance and safety for peace of mind on the water.

Elite 120: for inshore and coastal boating and fishing.

# OPEN OCEAN INFLATABLES

Inflatable flotation designed with additional features, buoyancy and equipment for when the shore is far away in every direction resulting in a potentially significant delay in time to rescue. Exposure to significant environmental conditions such as large seastates necessitate designs that provide the greatest amount of airway protection and a higher probability to turn unconscious users face up in the water.

## ATLAS 190 DLX LIFE JACKET

Model#	MD3195E1	
Approval	ISO 12402-3 (150N), ISO 12402-8 (SPRAYHOOD AND LIGHT), ISO 12401 (HARNES)	
Size	UNIVERSAL ADULT	RE-ARM KIT N (#MA3190)

A cutting-edge choice for offshore sailing, cruising, and boating, the Atlas 190 DLX Life Jacket is engineered with ADAPT Technology. This vest boasts an ergonomic design for all-day comfort and features such as an integrated sprayhood and SOLAS-approved water-activated light for enhanced visibility during emergencies.

- Hammar MA1 inflator is maintenance free for 5 years and prevents accidental inflation
- ADAPT technology incorporates bladder contouring that provides strong turning performance without hindering self-rescue or boarding of rescue crafts
- Low-profile tether point allows users to attach to jack lines (tether line not included)
- Integrated leg strap is detachable
- Lightweight anodized aluminum hardware provides durability and security
- Integrated sprayhood prevents secondary drowning
- Water-activated light increases on the water visibility
- Room for AIS and PLBs
- Ergonomically shaped to sit off the neck and provide all-day comfort
- 188N / 42 lbs of buoyancy

# OFFSHORE INFLATABLES

Inflatable flotation designed for offshore situations where the time to rescue may be delayed and exposure levels are high. Designed with additional safety features, greater airway protection and a higher probability to turn unconscious users face up in the water.

## ELITE 190 LIFE JACKET

Model#	USA: MD3170	CAN: MD3160
Approval	USCG - RECREATIONAL TYPE II / COMMERCIAL TYPE V	TC APPROVED (TYPE II PERFORMANCE)
Size	UNIVERSAL ADULT	RE-ARM KIT: RE-ARM KIT 0 (#MA3160)

The perfect companion for sailing, fishing, and boating in coastal and offshore waters, the new Elite 190 Life Jacket uses the same groundbreaking bladder design as our ATLAS line. This vest ensures a versatile fit for all-day comfort, compatibility for AIS and PLB, and impressive safety features, including the Hammar MA1 automatic inflator for worry-free wear on the water.

- Hammar MA1 inflator is maintenance free for 5 years and prevents accidental inflation
- ADAPT technology incorporates bladder contouring that provides strong turning performance without hindering self-rescue or boarding of rescue crafts
- Engine kill switch loop
- Room for AIS/PLB storage
- Built-in compatibility for optional leg straps (MA3032), sprayhood (MA3150), and light (MA7100)
- Ergonomically shaped to sit off the neck and provide all-day comfort
- 188N / 42 lbs of buoyancy

# COASTAL INFLATABLES

Inflatable flotation designed for coastal applications where users are far from shore but with a coast line always visible. The waterway has moderate exposure and there is potential risk of delayed rescue.

## ELITE 120 LIFE JACKET

Model#	USA MD5170	CAN MD5160
Approval	USCG - RECREATIONAL TYPE III / COMMERCIAL TYPE V	TC APPROVED (TYPE III PERFORMANCE)
Size	UNIVERSAL ADULT	RE-ARM KIT A (#MA5183)

Meet the Elite 120, an updated version of our Elite 28 with the same 28 lb (120N) buoyancy, perfect for anglers, sailors, and boaters seeking comfort on inshore to coastal adventures. Featuring our exclusive ADAPT Technology, it ensures top-notch performance and safety, providing peace of mind on the water.

- Hammar MA1 inflator is maintenance free for 5 years and prevents accidental inflation
- Engine kill switch loop
- Mesh back for comfort and breathability
- Ergonomic chassis and a low-profile design that sits off the neck provides all-day comfort
- 120N / 28 lbs of buoyancy

## MIT 150 CONVERTIBLE A/M INFLATABLE PFD

Model#	USA MD2020	CAN MD2021
Approval	USCG - RECREATIONAL TYPE V (TYPE II PERFORMANCE) / COMMERCIAL TYPE V	TC APPROVED (TYPE II PERFORMANCE)
Size	UNIVERSAL ADULT	RE-ARM F (MA7113)

This high buoyancy inflatable PFD offers excellent versatility with the ability to switch between automatic and manual inflation modes.

- Convert between automatic and manual-only inflation modes by simply swapping inflator caps (included)
- High tenacity nylon face fabric is supple and durable
- Exclusive Membrane Inflatable Technology™ creates a lightweight and flexible fit
- Zippered hip pocket specifically to carry converter cap
- Indicator window make inflator inspection simple and easy
- 38 lbs of buoyancy when inflated

## MIT 100 CONVERTIBLE A/M INFLATABLE PFD

Model#	USA MD2030/ MD2030CM	CAN MD2040/ MD2040CM
Approval	USCG - RECREATIONAL TYPE V (TYPE III PERFORMANCE) / COMMERCIAL TYPE V	TC APPROVED (TYPE III PERFORMANCE)
Size	UNIVERSAL ADULT	RE-ARM KIT L (MODEL #MA2030)

This versatile front entry inflatable PFD allows users to convert between automatic and manual inflation modes.

- Exclusive Membrane Inflatable Technology™ creates a lightweight and flexible fit
- High tenacity nylon face fabric is supple and durable
- 1-fold design is easy to repack
- Indicator window makes inflator inspection simple and easy
- Convert between automatic and manual-only inflation modes by simply swapping inflator caps (included)
- Will self-right most wearers (face-up) once inflated
- 28 lbs of buoyancy when inflated

# INSHORE INFLATABLES

Inflatable flotation designed for near shore or in-land water situations where waterways have less exposure and time to rescue is reduced.

### MIT 70 AUTOMATIC INFLATABLE PFD

Model#	MD4042	
Approval	HARMONIZED LEVEL 70	
Size	UNIVERSAL ADULT	RE-ARM KIT K (MODEL #MA4041)

This front entry automatic inflatable PFD has the lowest profile of its kind approved in North America, making it the perfect addition for all your inshore explorations.

- Exclusive Membrane Inflatable Technology (MIT) creates a lightweight, flexible fit
- Indicator window makes inflator inspection simple and easy
- Automatically inflates upon water immersion
- Manual inflation handle allows you to inflate the vest at any time
- Contrasting fabric is highly visible when inflated for increased safety in rescue scenarios
- 15.7 lbs of buoyancy when inflated

## KHIMERA DUAL FLOTATION PFD

Model#	MD7183	
Approval	HARMONIZED LEVEL 70	
Size	UNIVERSAL ADULT	RE-ARM KIT G (MODEL #MA7116)

This over-the-head entry PFD offers a dual flotation system that blends the security of foam with the slim profile of an inflatable.

- Lightweight and low profile design enhances mobility and comfort and eases re-entry into your boat from the water
- Adjustable shoulder and waist straps create a close-to-body fit
- Front storage pocket and slot hold extra CO2 cylinder (extra cylinder not included)
- Front shoulder attachment points for a knife, strobe, or other gear
- Reflective shoulder patches improve visibility in low light conditions
- Provides 20.5 LBS of dual buoyancy when inflated (7.5 LBS foam buoyancy and 13 LBS buoyancy when the cell is inflated)

BUOYANCY  
TURNING ABILITY

\* Type I inflatables are not currently available to recreational boaters in the USA.

† Type II inflatables historically were classified as inshore - coastal devices, but the performance characteristics are similar to other devices in this group.

‡ Type I foam is designated for offshore use by USCG historically, but has buoyancy closer to inshore - coastal vests.

# INTERNATIONAL STANDARD FOR PERSONAL FLOTATION DEVICES

## PERFORMANCE LEVELS

---

### Level 275

This level is for offshore use in severe weather and rough sea. It's great for people wearing air-trapping clothing or carrying heavy objects. When tested in swimming attire (fully inflated if inflatable), it turns an unconscious user's face above water without requiring active participation.

---

### Level 150

This level is for offshore and rough water use. It turns an unconscious user's face above water when tested in swimming attire (fully inflated if inflatable) without active participation.

---

### Level 100

This level is for calm or sheltered water situations where the user may need rescue. It keeps the user's mouth and nose above water when tested in swimming attire (fully inflated if inflatable) and requires no active effort to do so.

---

### Level 50

This level is for those near help or rescue and who can swim. It's compact, needs user participation, and isn't meant for long-term safety. When tested, it keeps the user afloat with their mouth and nose above water and can support a fully clothed person.

---

# HYPOTHERMIA PROTECTION

Cold water can deprive you of all mental and physical capacities within minutes, leading to hypothermia, unconsciousness, and even death. Our team of engineers has done extensive research to understand cold water survival. How long a person can survive in cold water primarily depends on the water's temperature, exposure time, and the thermal insulation of the victim's protective clothing.

## SURVIVAL TIMES

This graph indicates random samples of CLO values and the corresponding estimation of survival time in calm water (assuming a 5th percentile male with a 5.5°F [3°C] drop in core temperature).

## WHAT IS A "CLO" & WHAT DOES IT MEAN?

"CLO" is a measurement of the thermal insulation of a suit or device. One CLO represents the thermal insulation of an average comfortable resting person wearing business clothing in a room temperature indoor environment. Fractions of this thermal insulation are perceived when worn in the water. Each value is below 1.0 CLO because water transfers heat out of the body nearly 25 times faster than air. CLO values are reduced even more significantly in turbulent water compared to calm water, and test methods have evolved to address various conditions. Wearing a Mustang Survival jacket or suit will exponentially increase cold water survival time.

### WHEN IN STILL AIR

PROTECTION	CLO VALUE
NORMAL CLOTHING	1.00

### WHEN IN CALM WATER

PROTECTION	CLO VALUE
NUDE	0.06
Floater Coat	0.16
Floater Suit	0.42
Sentinel Dry Suit & Fleece Liner	0.66
Ice Rescue & Immersion Suit	0.75+

### EP 6.5 OCEAN RACING JACKET

Model#	MJ6512	Size	XS, S, M, L, XL, XXL
Fit	RELAXED	Material	MIL SPEC 6.5 GORE-TEX®

Mil Spec 6.5 GORE-TEX® and a YKK® AQUASEAL® zipper ensure this EP jacket keeps you dry when weather conditions deteriorate and seas get rough.

- 500D Cordura® reinforced elbows and forearms increase abrasion resistance
- 2-way YKK® AQUASEAL® waterproof zipper minimizes bulk and keeps you dry
- Cohesive™ bottom cinch creates a customized fit
- Removable high-visibility hood minimizes bulk at the collar and uses clear windows to maximize peripheral views
- Neoprene wrist cuffs with over cuff adjust to seal out water
- Two large dump pockets store essential gear, a sleeve pocket stores smaller items, and zippered fleece-lined pockets warm hands

### EP 6.5 OCEAN RACING DRY TOP

Model#	MJ6522	Size	XS, S, M, L, XL, XXL
Fit	RELAXED	Material	MIL SPEC 6.5 GORE-TEX®

This dry top uses durable, breathable, and waterproof Mil Spec 6.5 GORE-TEX®, added length, and watertight latex neck and wrist seals to provide maximum protection when conditions are at their worst.

- 500D Cordura® reinforced elbows increase abrasion resistance
- Latex neck and wrist seals provide maximum protection against water ingress
- Removable high-visibility hood with windows and collar system offers extra protection when needed
- The large chest pocket, and small sleeve pocket provide ample space to store critical gear
- Internal neoprene waist seal protects against water ingress in heavy seas and spray
- SOLAS reflectivity on shoulders increases visibility in low light conditions

## EP 6.5 OCEAN RACING SMOCK

Model#	MJ6502	Size	XS, S, M, L, XL, XXL
Fit	REGULAR	Material	MIL SPEC 6.5 GORE-TEX®

This EP racing smock utilizes durable, breathable, and waterproof Mil Spec 6.5 GORE-TEX® and latex watertight wrist seals for performance in high-intensity offshore sailing environments.

- 500D Cordura® reinforced elbows increase abrasion resistance
- Latex neck and wrist seals offer maximum protection against water ingress
- Large chest pocket, and small sleeve pocket provide ample space to store critical gear
- Neoprene waist seal protects against water ingress in heavy seas and spray
- SOLAS reflectivity on shoulders increases visibility in low light conditions
- Reinforced hanging loop provides secure storage

## EP 6.5 OCEAN RACING SALOPETTE

Model#	MP6502	Size	XS, S, M, L, XL, XXL
Fit	RELAXED	Material	MIL SPEC 6.5 GORE-TEX®

Constructed with Mil Spec 6.5 GORE-TEX® and a YKK Aquaseal® zipper, the EP 6.5 Ocean Racing Salopette offer head-to-toe waterproofness when integrated with any EP top.

- 500D Cordura® reinforced seat, knees, and hem increase abrasion resistance
- 2-way YKK® AQUASEAL® waterproof zipper minimizes bulk and keeps you dry
- Shoulder straps adjust for tailored fit
- Two large thigh pockets for quick storage; one with a window to reference important notes
- Chest pocket store smaller essential items
- Knee pads are removable
- Reinforced hanging loop provides secure storage

## REPLACEMENT HOODS

## MEN'S HUDSON DRY SUIT CCS

Model#	MSD20002	Size	S, M, L, XL, XXL
Replacement Accessories	SUSPENDERS (MA0201) / KNEEPADS (MA8008)		
Fit	RELAXED	Material	MARINE SPEC BP

This updated design makes a highly versatile men's dry suit for all your in and on-the-water adventures. Neoprene wrist cuffs and a CCS adjustable neck allow you to tailor your fit and comfort.

- Adjustable CCS (Closed Comfort System) neck seal provides watertight comfort and one-handed venting
- Trimmable Neoprene wrist seals offer a personalized and comfortable fit
- Collar and cuffs are designed to make repair and replacement easy
- 500D Cordura® on the seat and knees is durably abrasion-resistant
- Internal suspender system keeps the suit in place while in use and in standby mode
- Removable lightweight knee pads provide extra protection and comfort
- Thigh pocket stores essential items

## MEN'S QUADRA DRY SUIT

Model#	MSD100	Size	S, M, L, XL, XXL
Fit	RELAXED	Material	MARINE SPEC BP

Heading out for a good time, not a long time? The latex seals on this men's dry suit protect against colder temps during shorter-duration adventures.

- Trimmable latex neck and wrist seals provide maximum protection from water ingress
- Collar and cuffs design make repair and replacement easy
- External waist belt is adjustable and keeps the suit in place while in use and standby mode
- Wrist overcuffs protect seals and allow for easy adjustments
- 500D Cordura® on the seat and knees is durably abrasion-resistant

## MERIS WATERPROOF JACKET

Model#	MJ3511	Size	XS, S, M, XL, XXL
Fit	RELAXED	Material	MARINE SPEC BP

Designed and built for outstanding performance in challenging marine conditions, our Meris Jacket is redesigned for improved comfort and mobility. Crafted with durable 3-layer PFAS-Free Marine Spec BP fabric, featuring a 100% waterproof YKK Aquaseal zipper and an adjustable neoprene cuff system, this jacket offers superior protection in offshore environments.

- Packable hood design with clear peripheral-view windows
- Hood includes stowable face guard
- Neoprene inner lapping cuff system significantly decreases water ingress
- 100% waterproof YKK® AQUASEAL® zipper eliminates the requirement for storm flaps, enabling reduced weight and bulk
- Zippered and fleece-lined hand warmer pockets
- Low-profile dump pockets keep bulk out of the way
- Reflective elements improve low-light visibility

388 PACIFIC BLUE - MAHI

# USER GROUPS

Mustang Survival focuses on four categories of users, each with their own needs, motivations, and expectations.

## Recreation

People who explore and play on the water in all types of weather, from weekenders to expeditioners.

## Public Safety

The people who keep our waterways, communities, and countries safe and respond when lives need saving.

## Industrial

Workers who expose themselves to the—often extreme—elements and need the best gear possible to get the job done and get home safely.

## Military + Government

These groups and individuals are responsible for our national safety, often at the front lines around the world.

# PRODUCT ARCHITECTURE

Selecting the right gear for an activity can be challenging and overwhelming. When designing products our engineers and designers consider both the primary activity and the environments where the activities take place. The four main environments we consider are Inshore, Coastal, Offshore, and Open Ocean. Each of these environments are associated with different levels of risk and needs impacted by weather and water conditions and rescue possibilities. By considering intended use within an environment, our designers can create products (or gear) with the right characteristics (fit, features, materials, and construction) for the associated activity enabling the best possible experiences on the water.

## Inshore

- Shore is near and visible
- Lower exposure
- Shorter time to rescue

## Coastal

- Farther from shore but still visible
- Moderate exposure
- Moderate time to rescue

## Offshore

- Waters outside the protection from land
- High exposure
- Moderate to long time to rescue and external assistance

## Open Ocean

- Remote ocean waters
- Extreme exposure
- Very long time to rescue, external assistance may not be available

# MUSTANG SURVIVAL

## Marine Spec

Intentionally developed for the rigours of marine use, Marine Spec is highly abrasion, UV, and saltwater resistant. The three levels of Marine Spec (BP, SP, and MP) have unique characteristics for different environments, exposure, and ocean-based activities.

When choosing the Marine Spec fabric, Mustang Survival tested over 70 breathable materials and evaluated 12 different properties, totalling over 800 material tests, before completing real-world field assessments. The conclusion is Marine Spec is the ultimate combination of waterproofness, durability, and breathability.

### Marine Spec BP

#### Rugged & Durable

When the conditions and environment require nothing less than exceptional protection—rugged Marine Spec BP, the most abrasion and puncture-resistant fabric in the Marine Spec family, is the right choice. Modelled on Mil Spec 6.5 Gore-Tex, the Marine Spec BP demonstrates similar characteristics and performance.

The 70D nylon face fabric is highly durable with abrasion, salt water and UV resistance. The internal bi-component membrane, hydrophilic PU membrane, and PFC-free hydrophobic PU coating provide the most breathable, waterproof, and windproof performance of the Marine Spec range, and the nylon tricot backer offers next-to-skin comfort and extends the garment's life.

With a weight of 195 gsm, the Marine Spec BP fabric keeps wearers comfortable and dry in Mustang Survival's coastal and offshore apparel and dry suits.

### Marine Spec SP

#### Robust & Versatile

Marine Spec SP is the most versatile fabric in the Marine Spec line. The 3-layer fabric system is waterproof and windproof with exceptional breathability and unparalleled protection. Using the same 70D nylon face fabric as in Marine Spec BP, it is abrasion, salt water and UV resistant. On the inside, the bi-component membrane—which is thinner than in the Marine Spec BP—with hydrophilic PU membrane and PFC-free hydrophobic PU coating is fully waterproof and windproof to keep out the elements while maintaining a high level of breathability. The nylon tricot backer protects the inner membrane and creates more comfort against the wearer's skin. At 180 gsm, it is lighter than Marine Spec BP. But, with the same laminated peel strength, pilling rating, 24-hour launder and tear strength, and similar abrasion and puncture resistance, this fabric makes limited concessions in performance.

Select Mustang Survival inshore, and coastal apparel use Marine Spec SP.

### Marine Spec MP

#### Lightweight & Breathable

At 120 gsm, this is the lightest weight and most breathable fabric in the Marine Spec family; Marine Spec MP has a mechanical stretch that moves with its wearer and provides an unparalleled range of motion. The 3-layer construction is waterproof and windproof with a 50D nylon face fabric and inner monolithic and hydrophilic PU membranes. The nylon tricot backer is comfortable next to the skin and offers additional membrane protection. This fabric features a laminated peel with modest tear strength and puncture resistance, making it a great solution for transitioning through periodic inclement weather conditions.

Mustang Survival's inshore apparel utilizes Marine Spec MP.

# MIL SPEC 6.5 FABRIC WITH GORE-TEX TECHNOLOGY

Mustang Survival has been building leading dry solutions for military, coast guard, and water rescue professionals for decades. This expertise, military-grade fabrics, and a focus on maximizing waterproofness, breathability, and durability have allowed us to build the world's driest and toughest performance outerwear.

Until 2017, only the military, Coast Guard, and public safety products used Mil Spec 6.5 fabric with GORE-TEX technology. The fabric has a weight of 220 gsm, a durable 70D nylon face with high abrasion, salt water and UV resistance, and a nylon tricot backer that provides additional robustness and a comfortable next-to-skin feel. With years of validation in the field, it is now available to recreational users who demand the highest level of protection in the harshest marine environments with the EP 6.5 Ocean collection.

Working hand-in-hand with the GORE-TEX brand as manufacturing partners we integrate their technologies into products like our EP 6.5 Ocean Apparel. GORE-TEX tests their fabrics, membrane, insulations, and linings to meet their high quality standards before we begin our design and testing processes in the waterlife studio.

GORE-TEX GARMENTS

## BLUESIGN®/ OKEO-TEX

These certifications indicate Mustang Survival products use approved chemicals, are made sustainably, support socially responsible textile practices, and have a reduced impact on people and the environment.

## GAIA™ FOAM

Gaia™ foam is a nitrile butadiene rubber (NBR) based closed-cell foam free from PVCs, CFCs, phthalates, and halogens (fluorine, chlorine, bromine, iodine, astatine.) At Mustang Survival, we've chosen Gaia™ foam as it provides the same strong buoyancy, exceptional in-water performance, and comfortable suppleness our PFDs are known for while removing PVC-based foams from our products and reducing our environmental impact during production.

# MUSTANG SURVIVAL MATERIALS & TECHNOLOGY

## ADAPT TECHNOLOGY

Our exclusive new ADAPT (ADvanced Airway Protection & Turning) Technology incorporates three main features: bladder lobes shaped to effectively turn the wearer face up, baffle barriers near the chin to dissipate incoming waves to the face and an integrated pillow to optimize the angle of the face.

## Airsoft Foam™

Closed cell foam is used to trap air pockets, providing products with both buoyancy and insulation.

## Closed Comfort System (CCS)

Adjustable neck seal that can be worn loose when out of the water and tightened for immersion. Designed to optimize comfort in constant wear situations.

## Comfort Collar

Made of exclusive Mustang Survival materials to improve comfort around the neck, reduce chafing and encourage all-day wear.

## Comfort Cuff

Made of exclusive Mustang Survival materials to improve comfort around the wrists, reduce chafing and encourage all-day wear.

## Hydrostatic Inflator Technology (HIT)

Water-pressure activated inflation. The inflator will automatically inflate under water pressure and not inadvertently in rain, spray or humidity. Inflates only when submerged in 4" or more of water pressure.

## Membrane Inflatable Technology (MIT)

A lightweight inflation cell fabric membrane that reduces product weight to create a lighter and more flexible fit.

## Mobility Based Sizing™

A sizing and fitting platform exclusive to the Sentinel™ Series Dry Suits. With more than two years of extensive anthropometric research, range of motion testing and user evaluations, Mobility Based Sizing™ offers users a semi-custom suit that reduces bulk and increases range of motion without the expensive custom price tags or long lead times. Applies to all Mustang Survival dry suits beginning with MSD6.

## M-Tech™ Comfort System™

A 3-layer, waterproof, breathable, wearable flotation system that keeps you dry, floats you when you need it. The first layer is a waterproof, breathable outer shell, the second layer is segmented foam that flexes and moves with you and allows moisture to transfer away from the body and the third layer is a wicking liner that aids breathability. Included in the Catalyst Flotation Coats, Jackets and Pants.

## Rapid Repair Technology

Enables users to self-replace neck and wrist seals in an hour or less, and repair minor leaks in the dry suit shell.

## Securezip™

A self-healing zipper originally designed for military aviators. Creates a lighter weight, lower profile and more secure fit. Breaks out effortlessly upon inflation and heals itself upon repacking.

## Tug-Tite™

Adjusters designed to be easy to use with cold or gloved hands to improve fit and reduce water flushing.

## 3D Chassis

Exclusive to the Elite Inflatable PFD. Creates a slim profile to enhance mobility, fit securely and reduce neck fatigue. Wind-tunnel tested to improve the body's aerodynamics, reduce drag at speed and limit wind interference.

## Disclaimer about Technologies

Please note that not all of the technologies mentioned above are utilized in every product offered by Mustang Survival.

# DRY SUIT CONSTRUCTION

## MUSTANG SURVIVAL - DRY SUIT EXPERTS

In the last couple of years, more and more consumers have discovered marine activities and solitude on the water. Mustang Survival successfully introduced the Helix and Hudson to the recreational dry suit market, and the suits have become popular in various activities like SUPing, kayaking, angling, and with sailing teams.

Experience with public safety, commercial, and military products, and production facilities in Canada helped build consumer trust and establish Mustang Survival as an expert in dry suits.

## WHY A MUSTANG SURVIVAL DRY SUIT?

At Mustang Survival, we pay attention to the things that matter; thoughtful design, material selection, construction protocols, and product testing. Our build and material standards - testing, durability, and performance - are unrivalled in recreational dry suits. Every model of recreational dry suits uses the same rugged 3-layer Marine Spec BP material and 500D Cordura® reinforcement material.

One hundred percent of the suits that leave the factory are thoroughly leak tested using pneumatic air pressure and must have zero leaks. Other marketplace dry suits have been put through these same testing procedures, and have failed to perform at the same level. Our dry suits are a strong, sleek expression of Mustang Survival's clean and consistent design DNA. They deliver function and performance through purposeful design and features that are thoughtfully integrated without overbuilding.

# SUSTAINABILITY

## **GOAL: REDUCE MUSTANG SURVIVAL'S OVERALL ENVIRONMENTAL IMPACT**

This goal remains as true today as it will continue to be tomorrow—it is an ongoing effort and priority. Our current focus is choosing and developing fabrics and materials with lower environmental impacts.

### **This Includes:**

**PFAS-Free Materials and Treatments:** We are actively working to find alternatives and remove PFAS from all our products. By 2025, we will have eliminated them from our kids and youth flotation. By 2026, they will be removed from our recreational apparel line.

**Utilizing bluesign® and OEKO-TEX® certified materials:** These certifications indicate a product uses approved chemicals, is made sustainably, supports socially responsible textile practices, and has a reduced impact on people and the environment. For new product designs we seek out materials that meet these high standards.

**Using only PVC-free foam in our foam PFDs:** We've already replaced all PVC-based foam in our recreational lineup with Gaia™ foam or other PVC-free foam. Gaia™ foam is free from PVCs, CFCs, phthalates, and halogens, yet still provides strong buoyancy and in-water performance.

As we work on improving the impact of our products, we're also taking a bigger-picture and multi-faceted approach to ensure we continue to be part of the solution.

# WARRANTY + REPAIRS

Mustang Survival proudly guarantees the quality and performance of all our products. All Mustang Survival products come with a warranty that reflects our confidence in the high quality of our design, engineering, and manufacturing.

## WARRANTY PERIODS

### Practical Product Lifetime

- Outerwear
- Base Layers
- Gear Haulers/Bags
- Gloves

### 2 years from date of purchase

- Kids foam flotation
- Inflatable flotation
- Dry suits

### 1 year from date of purchase

- Adult foam flotation
- All other products

### What our warranty covers

Products with defects in materials or workmanship will be replaced or repaired at the discretion of Mustang Survival for the defined warranty period of the product.

The warranty excludes products damaged due to normal wear and tear, unauthorized modifications, embellishments or alterations, improper use, improper maintenance, accident, misuse, negligence, damage, or if the product is used for a purpose for which it was not designed, or used not in accordance with the product instruction.

Unauthorized product modification automatically voids the Mustang Survival warranty. Damage due to wear and tear may be repaired at a reasonable charge.

Mustang Survival will use reasonable discretion to determine the validity of warranty claims. Each situation is different and is up to the discretion of Mustang Survival to determine whether a product has a manufacturing defect or if it is suffering wear and tear.

In the case that a product does have a manufacturing defect deemed by Mustang Survival and is repairable, Mustang Survival may choose to not replace but to repair the product free of charge. The decision on whether to repair or replace a product is solely up to the discretion of Mustang Survival.

The warranty applies to the original purchaser only and proof of purchase is required. Mustang Survival products purchased from unauthorized retailers, online auction sites, or as second hand items are not covered under warranty.

The only obligation or liability of Mustang Survival under this limited warranty is to repair or replace the product and Mustang Survival shall not, under any circumstances be liable for loss of use or any consequential damages sustained by the Customer.

All other warranties expressed or implied, and remedies with respect to the condition or use of the product, which might otherwise be provided by law in any jurisdiction, are specifically excluded.

This warranty applies to commercial, recreation and industrial products.

Note: A recreational product used in a commercial/industrial environment will only be covered for 1 year against defects in materials or workmanship.

The warranty for products supplied under government contracts depends solely on the warranty agreed to as part of that contract.

## WHAT DOES PRACTICAL PRODUCT LIFETIME MEAN?

Practical Product Lifespan will be determined in the reasonable discretion of a Customer Service representative who shall take into account at least the following factors: the type and nature of the product, the nature of the use of the product, nature of the product issue involved, and age of the product.

# RECREATIONAL PRODUCT FIT GUIDE

Our apparel and gear are designed with a specific fit for intended activities and your safety. This guide is a resource that will help you find the perfect fit to best complement your waterlife adventures and enhance performance.

## BASE LAYER FIT

Our closest-to-body fit. Base Layer Fit can be layered under most mid-layers and all our technical shells.

- Slimmest Cut
- Fits under mid and outer layers

## TRIM FIT

Our slimmer-than-regular-fit offers a low-profile cut with tailored shoulders. Trim Fit technical shells can be worn over a first layer and lighter-weight mid-layers.

- Low-Profile, Tailored Cut
- Fits over first layers and lighter-weight mid-layers

## REGULAR FIT

Our classic fit has a comfortable cut throughout. Regular Fit technical shells can be worn over most mid-layers.

- Comfortable Cut
- Fits over most mid-layers

## RELAXED FIT

Our most generous fit. Relaxed Fit technical shells can be worn over the heaviest weight mid-layers.

- Most Generous Cut
- Fits over the heaviest weight mid-layers
- Dry suits cut to provide extra torso length enabling easier donning and doffing

## EXTENDED SIZING INFO

Designed and fitted as fully integrated systems, we create our two-piece outerwear lines as head-to-toe waterproof solutions. These collections act as the final piece of protection in your layering system. Carefully patterned by our in-house experts, the fully articulated garments—in regular and relaxed fit—ensure complete, unencumbered movement. The strategically placed seams increase garment durability, and our rigorous field testing assures all-day comfort.

We've created extended sizing for our EP and Meris collections to make these popular options accessible to more users, including women. Additional features like adjustable hems, cuffs, shoulder straps, and waists help to customize the fit further to accommodate wearers of different body types and genders.

When you need it most, this carefully considered outerwear provides the best against the elements.
