

XERO® C1 Pro Chronograph

Measure projectile speeds from 100 fps to 5,000 fps.

The button-operated design is simple to use.

Pair with the ShotView™ smartphone app to track your shots, measure deviation and more.

It's built to endure the elements with an IPX7 water-resistant rating.

The compact design fits in your back pocket and is easy to set up.

Battery life for up to 2,000 shots or up to 6 hours gives you plenty of time at the range.

Specifications

NOTICE

Typical value tested under Garmin’s laboratory conditions. The actual battery life depends on the features enabled on your device and environmental factors, such as Bluetooth connection and connected sensors.

Garmin hereby declares that the product’s battery automatically disconnects the power supply when the voltage drops to 3.6V.

Battery type	Rechargeable, built-in lithium-ion battery
Device description	Time-measuring device(Chronograph)
In the box	Device, 1/4 in.-20 thread tripod mount, USB A-C cable, manual
Rifle measurement accuracy	+/- 0.1% of the target velocity
Bow, pistol, and air rifle measurement accuracy	+/- 0.4% of the target velocity
Operating temperature range	From -10° to 55°C (from 14° to 131°F)
Charging temperature range	From 0° to 45°C (from 32° to 113°F)
Voltage	Battery: 3.6~4.35V USB (charging): 4.5~5.5V
Rated voltage	Battery 3.7V, USB 5V
Rated current	5V = 460mA
Wireless frequency and transmit power	Bluetooth: 2400 ~ 2483.5 MHz
Water rating	IEC 60529 IPX7 ¹
