The X4-LRF-15M is a high performance diode-pumped, solid-state laser rangefinder with integrated co-aligned pointers and a built-in weather station. It provides eye-safe laser ranging capability for weapon-mounted solutions. The onboard Applied Ballistics® solver generates an instant firing solution, and the optional Maztech Companion app enables quick ballistic profile management.

The X4-LRF-15M includes Maztech's reliable, low-noise, high-gain APD photoreceiver. This provides best-in-class sensitivity, allowing for long standoff range performance with less laser pulse energy, even in adverse environmental conditions.
